<sup>1</sup>Airbag Notice: The 2009 4Runner features a driver & front passenger airbag Supplemental Restraint System (SRS) which usually activates in a full-frontal collision of sufficient magnitude to inflate the bags. In moderate frontal collisions, the airbags may not inflate; in a rear or side collision the airbags are designed not to inflate, so the primary protection is provided by the lap and shoulder belt system. The 2009 4Runner also features a front seat-mounted side airbag and a roll-sensing front and rear head/side curtain airbag Supplemental Restraint System (SRS) which usually activates in a side-impact collision of sufficient magnitude to inflate the bags. *Seatbelts must be worn at all times by all occupants.*

<sup>2</sup>These estimates are based on the Government of Canada's approved criteria and testing methods. The actual fuel consumption of this vehicle may vary. Refer to the Government of Canada publication *EnerGuide Fuel Consumption Guide*.

<sup>3</sup>Payload = Passengers, Equipment, Luggage and Cargo.

<sup>4</sup>Torsen<sup>®</sup> is a registered trademark of Zexel Torsen, Inc.

<sup>5</sup>X-REAS Sport Suspension does not increase payload.

<sup>6</sup>2268 kg (5000 lb) towing capacity with standard factory-installed receiver hitch.
