

# Performance

Heart-pulsing power. Impressive fuel economy. Now you don't have to sacrifice anything with the redesigned 2012 Camry. The 4-cylinder includes a 2.5-litre engine, while the 3.5-litre V6 was engineered to create the exhilarating experience of having power at your control. The Dual Variable Valve Timing with intelligence or Dual VVT-i delivers optimum performance, fuel economy and lower emissions over a variety of engine speeds by constantly adjusting the intake valve timing to meet specific driving conditions.

The impressive Camry SE V6 shown in Barcelona Red Metallic.

**(A) RETUNED SUSPENSION**  
To enhance Camry's overall ride quality, we optimized the shock absorber tuning to achieve a high-end dampening feel. We improved Camry's handling and stability by recalculating the rear suspension geometry.

**(B) AERODYNAMIC FINS**  
Airflow under a vehicle is crucial to performance. On the reinvented Camry we added a series of broad plates that feature aerodynamic fins in the front and rear to help manage air turbulence beneath the vehicle, improving stability and handling.

**(C) VORTEX GENERATORS**  
The redesigned Camry features small specially shaped bumps or projections called vortex generators that are positioned on the undercarriage and at key points on the body. These vortex generators help to stabilize performance by dictating airflow behaviour around the vehicle.  
As air flows over the surfaces of a moving vehicle, friction can cause that air to tumble over and under itself, increasing drag and creating erratic air pressure forces around the vehicle. Vortex generators alter the airflow before it becomes turbulent, creating a series of controlled spins, or vortices, and helping to equalize air pressure forces, reduce drag and improve vehicle stability.

## Committed to Canadians, today and tomorrow.

Being a leader in the automotive industry does not simply begin and end with making great vehicles. It also means being a leader in the community. Toyota Canada and its dealerships across Canada fund the Toyota Canada Foundation, a non-profit organization that works to make a difference for Canadians, through direct community involvement supporting the environment, education and safety.

Through initiatives as diverse as the Toyota Earth Day Scholarship Program, Scientists in School, the Traffic Injury Research Foundation, and even the Toyota Volunteer Training Days program with Special Olympics Canada, the Toyota Canada Foundation is committed to Canadian communities, today and tomorrow.
